

Release Notes

Product 4View Model 100, 100 SDI, 200 (including NB)

VERSION: V3.02 - replaces all previous versions

PART # / CSUM:

COMPATIBILITY: Requires Hardware revision up to ECO 1184

NEW FEATURES: Supports use with video input signals having narrow Horizontal blanking. Useful only with non-standard composite video inputs.

CHANGES: Improved chrominance channel frequency response with S-Video inputs.

CORRECTIONS:

1. Previously when using SDI 625 line input signals, the output format defaulted to 1500 x 1080i after a power cycle. Now retains the correct 1600 x 1200i format following a power cycle.
2. Improved image quality with full screen SDI inputs (525 and 625 lines)
3. Corrects problem with lower windows tearing when operating with PAL video inputs.
