

## Release Notes

Product                    DGx 100/101

---

**VERSION:**                1.30

**PART # / CSUM:**        0x2151 (DGx MB)  
                              0x9622 (DGx DB)

**COMPATIBILITY:**      No compatibility issues except for VCP users.  
                              Must be used with VCP v1.30

**NEW FEATURES:**      N/A

**CHANGES:**

- Improved track list retrieval time.
- Error handling improvements when retrieving track list
- Improved Help text
- Improved responsiveness (Pause > Play transition)
- Improved track seek time
- VCP track data retrieval response time improved

**CORRECTIONS:**        The following anomalies have been corrected:

- An illegal timecode in response to 'MARK' command would cause system to crash.
- Intermittently, the 'TimeCodeSeek' command would report a timecode of --:--:--:-- after seeking.
- Occasional failure of DSS when exiting record mode.
- Intermittently, during playback, the 'NextTRACK' and 'PrevTRACK' commands could sometimes result in the message "Error: not in STOP or PAUSE mode", and playback of the new track would fail.
