

Release Notes

Product QuadView XL, DualView XL

VERSION: 1.08.4

PART # / CSUM:

COMPATIBILITY: Hardware version using R 102 only
Not compatible with R 1A

NEW FEATURES:

CHANGES/FIXES: **The following changes/fixes are included in this release.**

- 1 In previous versions if the Telnet client was set up in CRLF mode, the confirmation question (proceed yes/no) for firmware update was ignored. The confirmation is now functional regardless of the setting of the Telnet CR/CRLF mode.
- 2 Corrected an error with the way that Interactive Input timing adjustment works on the lower right corner of the image.
- 3 Interactive Output timing adjustments are now consistent with the behavior of the Interactive Input timing adjustment
- 4 WCP supports use of Java 5.0 in addition to Java 4.2
