

RGB Spectrum Expands Global Presence with Next-Generation *Zio* AV-over-IP Platform

Join Us at ISE 2025 in Barcelona, February 4-7, 2025

Alameda, California – January 29, 2025 – [RGB Spectrum®](#), a global leader in mission-critical video solutions for real-time decision support, today announced the expansion of its [Zio® AV-over-IP platform](#), which is experiencing growing demand in international markets. The company will showcase its next-generation video distribution and display technologies at the [Integrated Systems Europe \(ISE\) 2025](#) event in Barcelona, taking place from February 4th to February 7th, 2025.

RGB Spectrum continues to innovate with its *Zio* platform. At ISE 2025, we're bringing the latest advancements in visualization solutions for operations centers. The *Zio* platform, renowned for its comprehensive capabilities in signal distribution, switching, multiviewer display, recording, and KVM, is at the forefront of transforming control room environments.

At the show, we will showcase the powerful [Zio 4000 video wall processor](#), working seamlessly with integrated console displays and the remote networking capability of [XtendPoint™ KVM-over-IP](#) to provide operators with the tools they need for real-time decision-making.

"We're seeing strong growth for our *Zio* AV-over-IP platform across multiple regions, and we're thrilled to showcase these innovations at ISE 2025," said Scott Norder, COO of RGB Spectrum. "The demand for flexible, scalable, and high-performance video distribution solutions continues to accelerate, and our platform is uniquely positioned to meet the needs of our international customers in mission-critical environments."

RGB Spectrum's expansion into key international markets reflects the company's ongoing success and commitment to providing cutting-edge command and control solutions globally. Recent high-profile sales include:

- **Borouge** in Abu Dhabi, UAE, selecting the [Galileo® video wall processor](#) for their Borouge facility.
- **Hamad Medical Corporation (HMC)** in Doha, Qatar, implementing *Galileo* solutions in their Medical City, Rumaila, and Hamad Campus control rooms.
- **Dubai Airport** in the UAE, integrating the [Zio W4000](#) in their operations room.
- **Commercial Bank of Qatar** deploying *Zio W4000* in their media hall.
- **Mubadala** in Abu Dhabi, installing *Galileo* in their boardroom.
- **Dubai Customs** using *Galileo* in their Jebel Ali Port control room.

These new accounts are a direct result of RGB Spectrum's interactions and partnerships formed at last year's ISE event, underscoring the company's expanding influence in international markets.

Attendees of ISE 2025 are invited to visit RGB Spectrum's booth #5B600 to experience these video solutions and learn how they can enhance real-time decision-making across a variety of critical industries.
